**DETAILED ACTION**

1. This is the second office action for application serial number 10/772,568. The reply filed on 8/20/04 contains claims numbered 1-8. Claim 9 has been canceled.
2. Claims 2-3 and 10 are allowed with the following examiner's amendment below:

**EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Klaus J. Bach on September 7, 2004. The application has been amended as follows:

Claims 1 and 4 through 9 have been canceled.

Claim 2, line 2, "claim 1" has been deleted, and -- claim 10 -- inserted.

Claim 2, line 2, after said and before bushing, -- cylindrical -- has been inserted.

Claim 3, line 2, "claim 1" has been deleted, and -- claim 10 -- inserted.

Claim 3, line 2, after said and before bushing, -- cylindrical -- has been inserted.

New claim 10 has been added as follows:

--10. (New): A support device for supporting an article, particularly in a motor vehicle, comprising a support arm (8) consisting of a flexible tube with a bendable rod disposed therein and having at one end thereof an adapter plate (9) for supporting said article at the other end a clamping element (1) including a cylindrical bushing (2) of an

elastic material for reception in a cylindrical opening (1a) defined by a wall, said cylindrical bushing (2) being provided at opposite axial ends with conical openings (2a, 2b) whose diameters increase toward the axial outer ends of the cylindrical bushing (2), conical engagement members (3, 4) arranged at the opposite ends of said cylindrical bushing (2), and a threaded bolt (5) extending axially through said conical engagement members (3, 4), by which the conical engagement members (3, 4) are movable toward each other for expanding said bushing (2) into firm engagement with the wall of said opening (1a) for securely supporting said clamping element (1) in said cylindrical opening (1a), said clamping element (1) including a sleeve (6) connected to said threaded bolt (5) for operating said bolt 95) and including an opening (7) in which said support arm (8) is mounted. –

REASONS FOR ALLOWANCE:

3. The following is an examiner's statement of reasons for allowance: No individual citation or obvious combination of citation disclose or suggest a support arm comprising a flexible tube with a bendable rod disposed in the flexible tube in combination with other limitations as recited in claim 10 to be anticipated or rendered obvious the above combination. The closest prior arts are Liebig (US 3,911, 782) and Champ et al (US 6,189,407). However, Champ et al. does not disclose the bushing being provided at opposite axial ends with conical openings whose diameters increase toward the axial outer ends of the bushing; Liebig discloses substantially as claimed but does not

disclose a support arm comprising a flexible tube with a bendable rod disposed in the flexible tube.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
